

Chatterbox

1. Cut out the square.
2. Fold and unfold the square, along all four lines of symmetry. The creases will form a 'star' to show you the center of the chatterbox.
3. Place the chatterbox on a flat surface, the blank side facing up. Fold each corner into the centre.
4. Turn the chatterbox over. Fold each corner into the centre.
5. Fold the chatterbox in half - so four square flaps are facing outwards.
6. Insert your thumbs and index fingers under the flaps. As you pinch your fingers together, the chatterbox will take shape.
